

READING**(15 marks)**

Read the following text and then answer the questions below:

The bright colors of birds, the call of monkeys and the hum of insects are common sights and sounds in a tropical rainforest. Rainforests grow near the Equator, where it is always warm and wet- the perfect habitat for plants and animals.

In Papua New Guinea, scientists have just discovered a new rainforest. It has existed for many thousands of years at the top of a mountain. It has always been very difficult to reach. Even the people who live on the slopes of Mount Bosavi have rarely visited this hidden rainforest. It is very high up, at over 2,500 meters above sea level, and it is hidden inside the hole of a huge volcano. In 2009 CE, an international team of scientists visited Mount Bosavi and discovered an amazing world of plants and animals there. **They** discovered many colorful, tiny frogs, some unusual species of fish, rare bats and spiders, a kangaroo that looked like a small bear, and a giant rat that was as big as a cat. Altogether, the scientists found more than forty new species of animals, as well as many rare or new plants.

Questions**(15 marks)**

1-Where do rainforests grow?

(3 marks)

.....

2-Name two animals that scientists discovered in the rainforest of Mount Bosavi?

(2 marks)

a. _____

b. _____
